Appln No. 10/626,108 Amendment dated April 3, 2007 Reply to Office Action of January 3, 2007 Docket No. BOC9-2003-0006 (375)

- 3. (Currently amended) The method of claim 1, wherein the method further comprises the step of sending the text message to the callee via the at least one of said instant messaging devices system.
- 4. (Cancelled)
- 5. (Original) The method of claim 1, wherein the method further comprises the step of querying the caller as to when an instant message should be delivered when the caller selected the instant message as an option.
- 6. (Currently Amended) The method of claim 1, wherein the method further comprises the step of delivering the instant message to the callee at least one of said instant messaging devices at a predetermined scheduled time as directed by the caller.
- 7. (Withdrawn) A method to enable instant collaboration, comprising the steps of: receiving a text message having a designation for text-to-speech conversion via an instant messaging server, wherein the text message is intended for a phone coupled to a voicemail system;

recognizing the designation;
converting the text message to a voice message;
calling the phone; and
delivering the voice message to the voicemail system.

- 8. (Withdrawn) The method of claim 7, wherein the method further comprises the step of enabling a scheduled delivery of the voice message to a user.
- 9. (Withdrawn) The method of claim 7, wherein the method further comprises the step of delivering the voice message to a user.

Appln No. 10/626,108 Amendment dated April 3, 2007 Reply to Office Action of January 3, 2007 Docket No. BOC9-2003-0006 (375)

- 10. (Withdrawn) The method of claim 7, wherein the method further comprises the step of delivering the voice message to the voicemail system.
- 11. (Currently Amended) A system enabling instant collaboration, comprising: a voicemail system; an instant messaging system coupled to the voicemail system; a processor in the system programmed to:

receive a call when a callee is unavailable,

determine if the callee is available via the one or more instant messaging devices, system;

provide a caller the option among a voice message and an instant message, [[;]]

record a voice message from the caller to the callee and generate a text message by transcribing the voice message if the caller elects the option of leaving the instant message; and,

determine a preferred language of the callee for each one of said instant messaging devices, wherein said preferred language is determined according to a user profile corresponding to each one of said instant messaging devices, and

translate the text message into the preferred language of <u>each of said</u> instant messaging devices having said corresponding user profile specifying <u>a the callee if the preferred language of the callee that</u> is different from a language of the <u>transcribed text message</u>.

12. (Currently Amended) The system of claim 11, wherein the processor is further programmed to deliver the instant message to at least one of said instant messaging devices the callee at a predetermined scheduled time as directed by a caller.

Appln No. 10/626,108 Amendment dated April 3, 2007 Reply to Office Action of January 3, 2007 Docket No. BOC9-2003-0006 (375)

- 13. (Original) The system of claim 11, wherein the processor resides within the voicemail system.
- 14. (Withdrawn) A system enabling instant collaboration, comprising:

a voicemail system;

an instant messaging system coupled to the voicemail system;

a processor in the system programmed to:

receive a text message having a designation for text-to-speech conversion via the instant messaging system, wherein the text message is intended for a phone coupled to the voicemail system;

recognize the designation;

convert the text message to a voice message;

call the phone;

deliver the voice message to the voicemail system.

- 15. (Withdrawn) The system of claim 14, wherein the processor resides within the voicemail system.
- 16. (Currently Amended) A <u>computer-readable</u> machine-readable storage, having stored thereon a computer program having a plurality of code sections executable by a machine for causing the machine to perform the steps of:

receiving a call from a caller to a callee

transferring the call to a voicemail system when the callee is unavailable;

determining if the callee is available via one or more instant messaging devices;

querying the caller if they want to leave one among a voice message and an instant message; [[and]]

recording a voice message from the caller to the callee and generating a text message by transcribing the voice message if the caller elects the option of leaving the instant message; [[and]]

determining a preferred language of the callee for each one of said instant messaging devices, wherein said preferred language is determined according to a user profile corresponding to each one of said instant messaging devices; and

translating the text message into the preferred language of the callee if the each of said instant messaging devices having said corresponding user profile specifying a preferred language of the callee that is different from a language of the text transcribed message.

17. (Withdrawn) A machine-readable storage, having stored thereon a computer program having a plurality of code sections executable by a machine for causing the machine to perform the steps of:

receiving a text message having a designation for text-to-speech conversion via an instant messaging server, wherein the text message is intended for a phone coupled to a voicemail system;

recognizing the designation;

converting the text message to a voice message;

calling the phone;

delivering the voice message to the voicemail system.
